- (3) After the publication of any proclamation under subsection (2), every survey for any purpose under any Act of any area which is wholly or partly within or contiguous to the proclaimed survey area, shall be connected, as prescribed, to at least two established survey marks for the proclaimed survey area either –
- (a) directly; or

- (4) It shall be the duty of the Surveyor-General when requested so to do to advise the surveyor of any public authority or any registered surveyor as to how proposed surveys of any area may be connected with the established permanent survey marks, and to authorize any indirect connection as provided by this section which appears to him to be more convenient or economical than a direct connection, and any survey carried out, or plan prepared, in accordance with the written authority of the Surveyor-General shall, if the authority is attached to the plan, be deemed for all purposes a sufficient compliance with the requirements of this section.

  - (i) carrying out, for or on behalf of, and with the consent of, any two or more public authorities of any survey which may be required by such authorities; or
